ZINC

Strength for the years ahead

Hackathon prototype for movement, reasoning & relaxation

Hackathon team: Viviana Romero-Alarcon, Kesline Diogene Jean Baptiste, Anagha Patil, Sohan Arigela,

PROTOTYPE

1 The Problem

Turning wellness advice into a manageable weekly routine can be difficult.

ZINC combines guided activities with feedback and adjustable plans.

Fictional demo: Maria, 52, wants a home routine that fits her needs.

2 Who + What

Designed for adults 40–59 seeking a manageable home routine.

Four practices, with balance in strength:

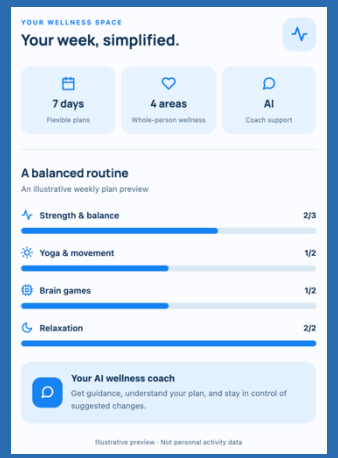

- 💪 Strength
- 🧘 Yoga
- 🧠 Reasoning
- 🌿 Relaxation

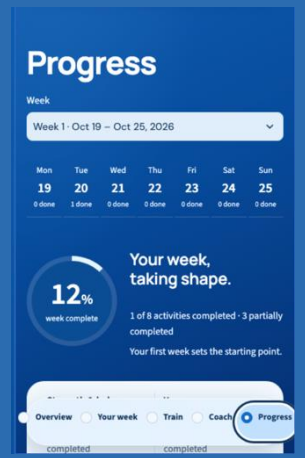

3 How it works

1. Rules screen and plan
2. AI proposes adjustments
3. You accept or decline
4. Apply to next week

Responsible Agentic AI

✅ Rules generate the plan and validate proposed changes. ✅ The AI coach reads activity feedback and explains proposals. ✅ You approve adjustments before they enter next week's plan. ✅ Progress tracks participation and self-reported feedback.

Prototype in action

12% of the demo week complete
1 of 8 activities completed
3 activities partly completed
