Anagha Patil

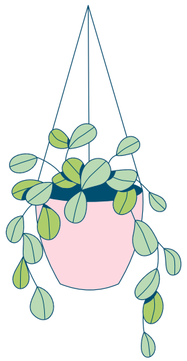

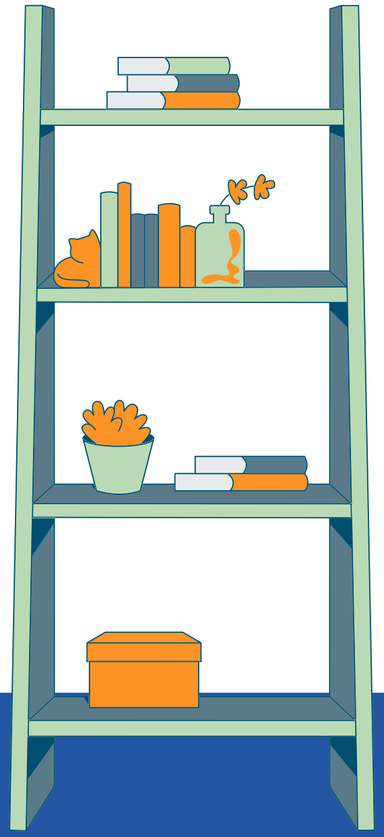

Problem Statement

- Strength and balance decline from midlife and track with brain health.
- Coached programs work but don’t scale.

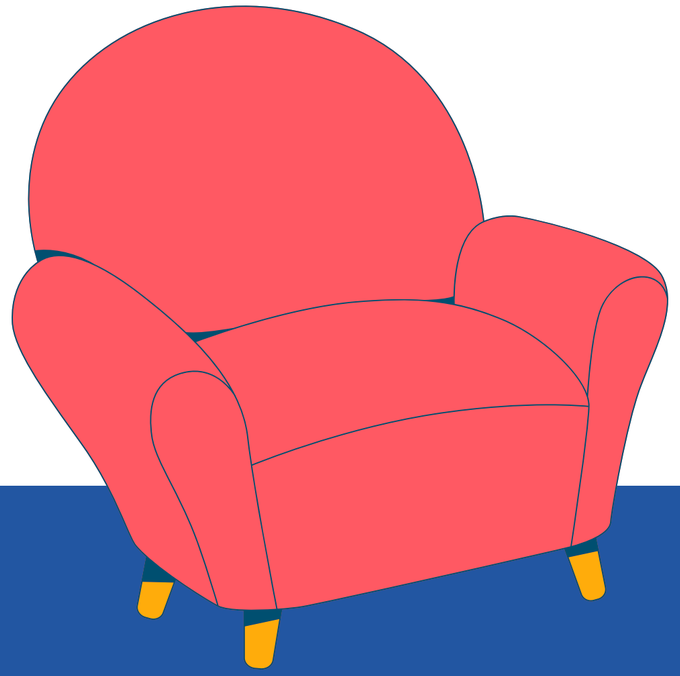

Target users

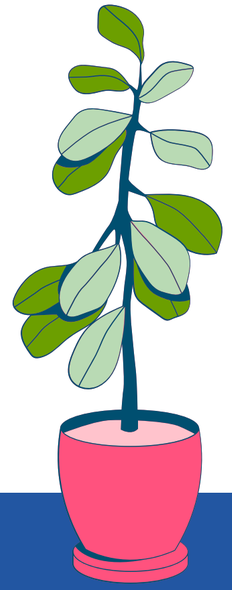

Adults 40–59 first, then
60+ and caregivers

Solution

- Weekly sessions.
- Four practices: strength & balance, yoga, reasoning games, and relaxation
- With a coach that proposes and the user decides

Eligibility Rules

Rules engine decides eligibility and progression

Human Decisions

Human always accepts or declines.

Why Agentic AI

AI Recommendations

AI only reads context and proposes.

Safety Guardrails

Safety stops never call the AI.

03

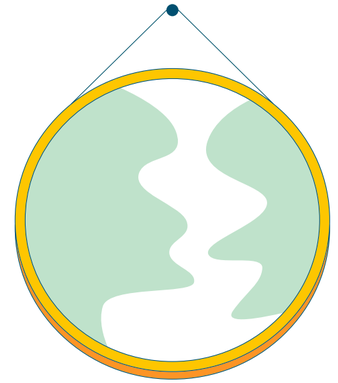

Participation, not a health score

- Completed and partial activities stay distinct
- Reasoning results show the answer count
- Relaxation minutes are self-reported

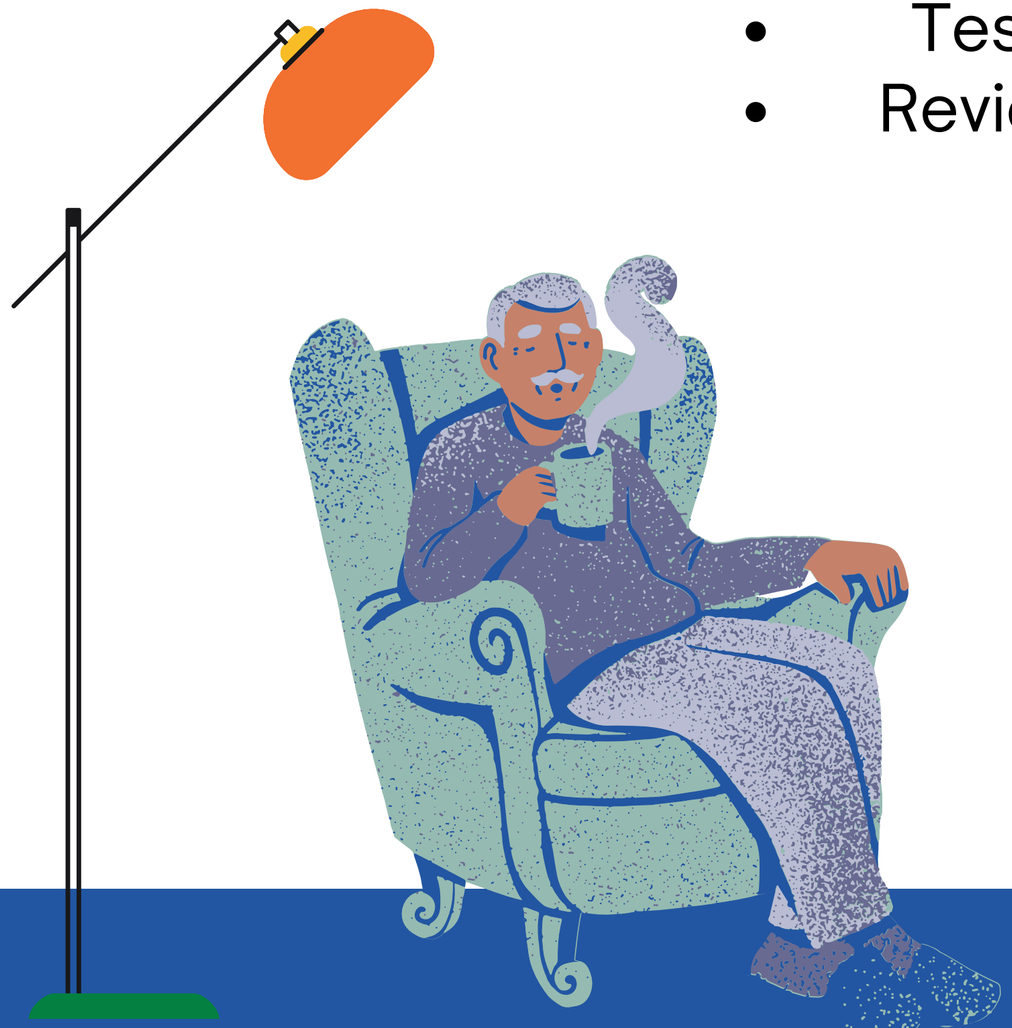

Next steps

Validate the experience:

- Test independently on real phones
- Review exercise content with people

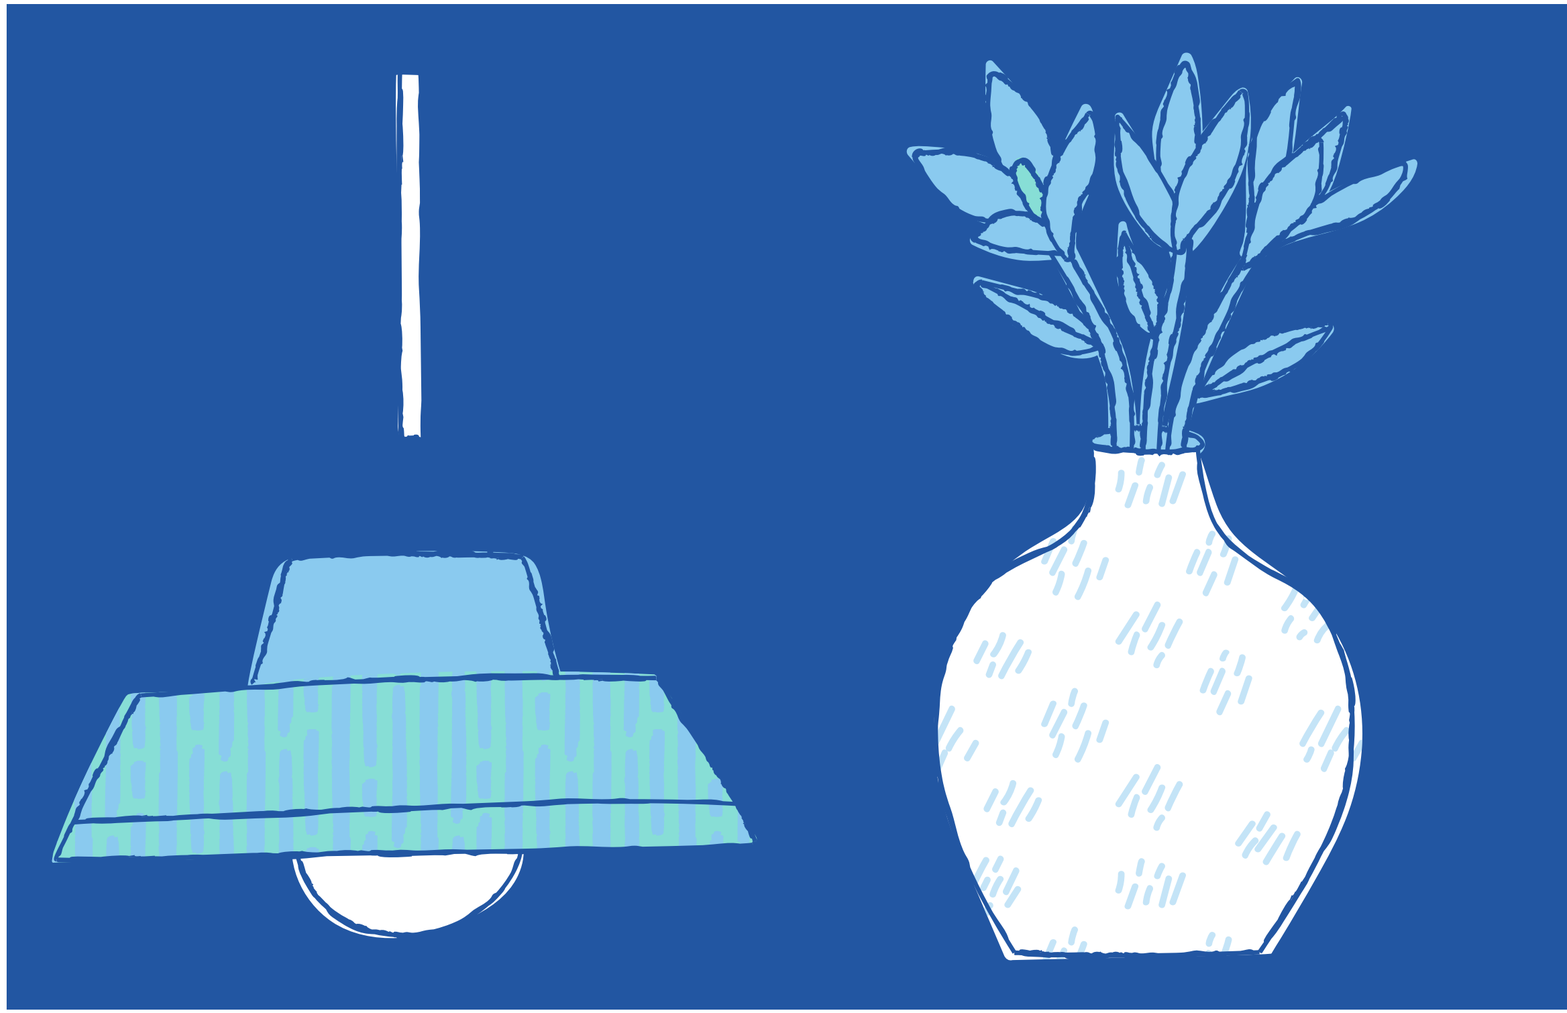

Optional features:

- Complete pain and effort trend charts
- Connect with smart devices / food apps

Make a consistent weekly routine easier to follow.
